

The *Young Investigators Network* (YIN) invites early-career scientists to participate in a social event in the frame of the *European Aerosol Conference 2024* (EAC2024) with the possibility to meet other early-career scientists and become a part of the young aerosol network.

Visualisation in Science

Every time a conference approaches there is this question:

How do I make people stop at my poster? How do I stand out during my talk? or maybe something like How do I make people remember my science?

We invited **Andreas Dahlin** for this year's YIN event to improve our visualisation skills. Andreas Dahlin specialised on visualisation in science and designs and teaches courses with the goal to make everybody a better science communicator. Come along to listen to his key points and - of course - ask for the best tips and tricks, so that you can win your next poster competition!

Meme competition

We are excited to announce a Meme Competition as part of our event! Create a meme about **your research** and share it on social media by tagging us at @NOSA_ECSvoices & @G_Ae_F and using the hashtag #ResearchMeme #EAC2024. Alternatively, you can email your meme to erk@chem.au.dk, and we will post it on your behalf. Exciting prizes await the best memes, with winners announced at the YIN event. Join the fun and showcase your creativity!

Join us for insights into the topic and a discussion!

After the workshop, snacks and a drink will be served with further socialising.

The event is organised by a team of early career scientists under the umbrella of the *Gesellschaft für Aerosolforschung* (GAeF, the *German aerosol community*) and the Nordic Society for Aerosol Research (NOSA) early career scientist (ECS) board and *TSI GmbH*.
